TopBraid EDG™ is an agile data governance solution for today’s dynamic enterprises. A modular, extendable solution based on open knowledge graph standards, it provides integrated data governance across the ever-growing types of assets and governance needs. With TopBraid EDG, organizations are now finally able to connect their silos of data and metadata, and unlock the true meaning behind their business’ data.

 Challenges that TopBraid EDG Addresses

Today, the scope and diversity of enterprise data is greater than ever before. Without meaningful connections that can span data sources, greater diversity results in a greater number of data silos. Data becomes hard to find. It gets misinterpreted. It gets misused or underused. TopBraid EDG can connect technical, business, and operational metadata across all types of sources, creating a shared data landscape. Its flexible data model helps in overcoming complexity and “paving the road” to comprehensive governance and compliance.

Natively based on ontologies and Linked Data, TopBraid EDG enables data transparency, interoperability, and supports the emergence of the “cognitive enterprise.”

With TopBraid EDG, enterprises can:

- **CONNECT** all your data assets for increased visibility and agile responsiveness to new data requirements
- **CATALOG** all your assets and create critical mappings
- **CURATE** your data and metadata to enhance access to all relevant information and use it more intelligently
- **COLLABORATE** with all data stakeholders to improve the quality and consistency of data

TopBraid EDG includes over 100 predefined asset types. Customers can easily add additional asset types.
TopBraid EDG is the first data governance solution that is based on knowledge graph technologies. It supports and integrates all three aspects of data governance as illustrated in the governance triangle shown below.

A GOVERNANCE TRIANGLE

Executive Governance:
- Framework
- Methodology
- Stewardship
- Process
- Policies
- Metrics
- Maturity Assessment

Representative Governance:
- Glossaries
- Taxonomies
- Ontologies
- Data
- Technical and Enterprise Assets
- Reference Data

Applied Governance:
- Lineage
- Impact Analysis
- Metrics
- Data Quality
- Compliance Reporting

Governance Packages Available in TopBraid EDG

In ramping up a data governance program, different organizations may have differing starting points. With TopBraid EDG, you can start incrementally and add capabilities as you go. For details on available EDG packages and additional modules, visit topquadrant.com/products/topbraid-edg-gov-packs/

About TopQuadrant

TopQuadrant helps organizations succeed in data governance. Its flagship product, TopBraid EDG, delivers easy and meaningful access for all data stakeholders to enterprise metadata, business terms, reference data, and application catalogs, data lineage, requirements, policies, and processes. TopQuadrant’s customer list includes organizations in financial services, pharma, healthcare, digital media, government and other sectors.
